

BOWL

Bowl is robust and reliable fountain for public spaces. The product is suitable in parks, kindergartens, schoolyards or sports facilities where fresh drinking water is needed all year round. The design is made without sharp edges and protrusions.

BOWL

Frostline is manufactured in Denmark and has more than 25 years of experience. We offer a wide range of frost-free outdoor products in beautiful design, high quality and with great functionality.

The fountain works by a self-draining mechanical valve empties the water tap after use, ensuring fresh water all year round. Our products do not require use of electricity to ensure frost-free, and made in stainless steel - and is therefor environmentally friendly in every way. The one handle grip provides a simple operation and good comfort. The product is delivered complete with a well.

We recommend

It is recommended to use supply water pipes of PEM pipes of 25mm or larger.
