EQI WALL VALVE

Embellish your facade with the frost-free and timeless Frostline wall from the EQI series, ensuring water for tasks such as car washing and gardening. Upgrade your home and transform a practical measure into an aesthetic source of quality of life. The frost-free faucet comes with a matching hose saddle, providing an elegant storage solution for your garden hose. The fixture is handcrafted in Denmark and made of durable materials, ensuring a solution that you can enjoy for many years.

EQI WALL VALVE

Frostline, crafted in Denmark for over 25 years, presents a diverse collection of frost-free outdoor products renowned for their elegant design, superior quality, and functionality.

Wall operates by using a self-draining mechanical valve to empty the post valve of water after use, ensuring fresh water year-round. Our products do not require electricity to ensure frost-free operation and are made of stainless steel - environmentally friendly in every way. The water hydrant is a lever, providing simple operation and great comfort.

Installation

If connection with a 1/2" is desired, the copper pipe is cut completely down.

Glassblown

Copper

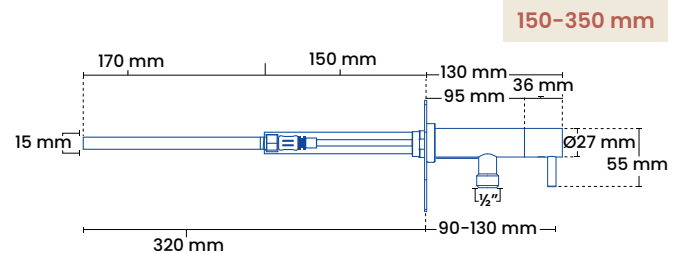

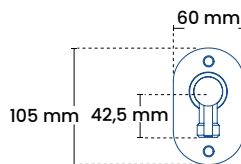

Brass

The matching EQI hose holder is available for EQI Wall valve.

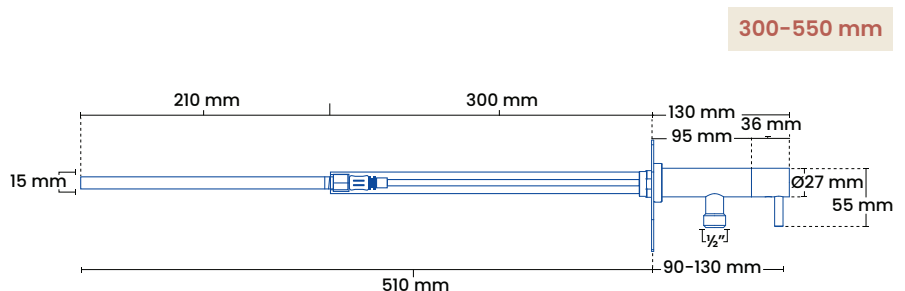

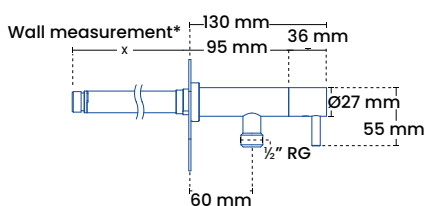

IMPORTANT

Wall mounting: For frost-proof function and guarantee, there is a requirement for a frost-free water supply year-round and that the product has a slope of at least 2-3‰ towards the outer wall. Additionally, a product in standard measurements should be used. **Note:** At temperatures below 5 degrees Celsius, hose fittings or other equipment that reduces clearance must not be installed.

150-350 mm

*For Frostline pex-connection

300-550 mm

Specifications

Product dimensions

Hose connection	1/2"
Connection	15 mm or 1/2"
