EQI BUILT-IN OUTDOOR SHOWER

The minimalist wall-mounted outdoor shower from the EQI series is built-in. With the Shower, you get a frost-free solution that fits your outdoor environment exactly.

The subtle floating expression can contribute as an elegant addition to your house, regardless of whether it is in a modern Scandinavian style or a classic mason's villa.

The shower is hand-assembled in Denmark, and produced from solid and rust-free materials, so you can enjoy it for many years.

EQI BUILT-IN OUTDOOR SHOWER

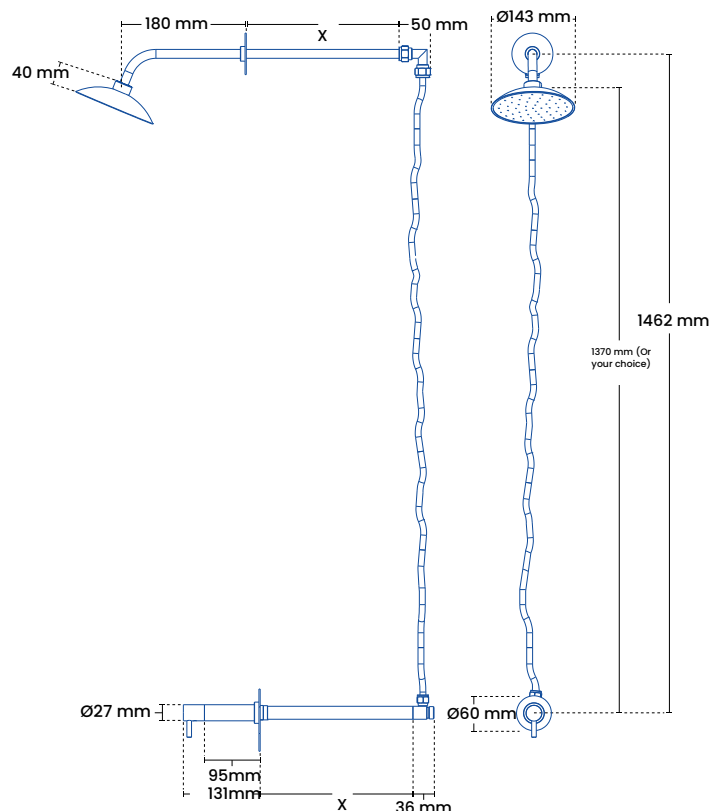

Frostline is manufactured in Denmark and today has more than 25 years of experience. We offer a wide range of frost-free outdoor products in beautiful design, high quality and with great functionality. The shower works by a self-draining mechanical valve emptying the shower of water after use, so you can shower all year round. Our products do not require the use of electricity to ensure frost-freeness, and are made of stainless steel, so environmentally friendly in every way. The shower is one-lever.

Possibility of tempered water

It is possible to bathe in water with a desired temperature. It is done quite simply with a mixing circuit on the water connection. An environmentally sound and advantageous solution, as you both save costs for installation and operation, as well as ensuring good daily comfort. You get the same water temperature every time, and at the same time avoid accidental scalding and large heat losses in the water supply. The temperature can be regulated as desired.

Important!

For the function, it is important that the pipe which is led through the wall falls at least 3‰ towards the facade, so that the fixture can be emptied of water.

Wall thicknesses:

"X" indicates the installation dimension

Glass blown

Copper

Note:

copper surface must be specially produced.

Specifications

Installation target

Stand height from handle	1462 mm (optional)
Pin height from handle	1370 mm (optional)
Jump from facade to center shower head	180 mm
Shower head	Ø 143 mm
Connection	½"
