EQI FREE STANDING WATER TAP

The free-standing water tap from the EQI series is for you who value quality and timeless design. With this solution, you get an innovative frost-free water solution that, like all our products, is hand-assembled in Denmark and produced from solid materials.

This variant has a tap height of 445 mm.

EQI FREESTANDING WATER POINT

Frostline is manufactured in Denmark and today has more than 25 years of experience. We offer a wide range of frost-free outdoor products in beautiful design, high quality and with great functionality. The water post works by a self-draining mechanical valve emptying it of water after use, so you can use it all year round. Our products do not require the use of electricity to ensure freedom from frost, and are made of stainless steel, so environmentally friendly in every way. The water tap is a handle, which provides simple operation and good comfort. The product is delivered complete with well.

We recommend

It is recommended to use a supply water line of PEM pipe of 25mm or larger.

Glass blown
