DUO WALL POST VALVE

Wall is an exclusive valve developed for the home and summer house. Similarly to the rest of Frostline's range, Wall is frost-proof, so frost cracks are avoided. The product is made of stainless steel, which ensures a minimum of maintenance and is prepared so that a garden hose can be mounted on the spout.

Wall and Elipse hose saddle, available in four different surface treatments: glass-blown steel, electro-polished steel, black and copper.

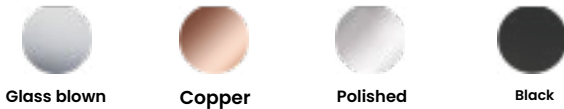

DUO WALL POST VALVE

Frostline is manufactured in Denmark and today has more than 25 years of experience. We offer a wide range of frost-free outdoor products in beautiful design, high quality and with great functionality.

Wall works by a self-draining mechanical non-return valve emptying the tap valve of water after use, which ensures fresh water all year round. Our products do not require the use of electricity to ensure frost-freeness, and are made of stainless steel - so environmentally friendly in every way. The water dispenser is a handle, which provides simple operation and good comfort.

Assembly

If connection with ½" thread is desired, shorten the copper pipe all the way down.

Glass blown

Copper

Polished

Black

Note: Polished, black or copper surface must be specially produced.

See also DUO hose holder, which matches perfectly with DUO Wall.
