

4041

PRO FREE STANDING WATER TAP

The frost-free PRO water tap is produced from solid materials, so you get a solution that is suitable for public spaces.

The push button ensures that the water dispenser switches off automatically after use, so that you are protected against unnecessary water consumption. The water tap is hand-assembled in Denmark.

This variant has a tap height of 445 mm.

PRO FREE STANDING WATER TAP

Frostline is manufactured in Denmark and today has more than 25 years of experience. We offer a wide range of frost-free outdoor products in beautiful design, high quality and with great functionality. The water dispenser works by a self-draining mechanical valve emptying the water dispenser of water after use, so you can use it all year round. Our products do not require the use of electricity to ensure frost-freeness, and are made of stainless steel, so environmentally friendly in every way.

The water dispenser is one-handle, which provides simple operation and good comfort. The product is delivered complete with well.

We recommend

It is recommended to use a supply water line of PEM pipe of 25mm or larger.

Specifications

With a well For function and guarantee, there is a requirement for a frost-free water supply all year round, that the well is buried so that the top is in the ground and that the well is dry at all times. Below 5 degrees, no hose nozzles or equipment may be fitted.
